## Sorting through iPad/Tablet Carrying Case

For iPad/Tablet users and their clinicians, teachers, parents and AT providers, protecting the iPad/Tablet while being carried out-and-about the community, school and home settings is primary concern. During this session, we will demonstrate the features of iPad/Tablet carrying cases, especially as they relate to the needs of users of apps for AAC systems. We will demonstrate a wide variety of cases and their features of shock-resistance, carrying handles, mounting positions and access to the camera. Options, such as built-in speakers and Bluetooth keyboards, are additional features that some want on their case. Favorite color and design skins allow personality and customization to the iGeneration.
